Staff Changes

Our beautiful and talented dental assistant, Bibi Yadetta, has moved to the Seattle area so she can be closer to her sisters and attend the dental hygienist program at the University of Washington. She was a favorite of our patients and an irreplaceable member of our staff. We will miss her witty sense of humor and her amazing ability to make us feel like rockstars even when we were having a rough day.

~ Rachel Harston has stepped in as the newest member of our dental team. She is proving to be a quick learner and an exceptional dental assistant!

Begin with the end in sight *

The majority of orthodontic planning is done from start to finish, by making adjustments along the way until the desired result is achieved. *Insignia* works backwards. Dr. Chiang is able to take digital impressions of the patient's teeth, and by utilizing *Insignia's Approver* software, he is able to reverse engineer a patient's smile. In other words, the software simulates the final result so that the dentist can map out a course of treatment for the patient. Using the newly launched *TruRoot* feature, Dr. Chiang can combine the data from a patient's CBCT scan with the digital impressions to create a more accurate representation of a patient's smile. *Insignia* can then manufacture custom brackets, wires, and placement guides so that patients are able to achieve their perfect smile. *

When Dr. Chiang is away...

Please note that when Dr. Chiang is out of the office, his cell phone number, or contact information for one of our staff members, will be listed in the message on our answering machine. If you are experiencing a dental emergency and need immediate assistance, please call your regular physician or Pullman Hospital Urgent Care at (509) 336-7365.

Dr. Chiang's Continued Education Courses:

Sep 19th-23rd: *Interdisciplinary Approaches*; Munich, Germany.

Oct 10th-13th: *European Association of Osseointegration Annual Congress*; Vienna, Austria.
